

Banned Drug Classes

Following is a list of the NCAA banned-drug classes. Nutritional/dietary supplements may contain banned substances and are not regulated in any way. If you have any questions about a supplement you are taking, bring it in to James to have him look at it. This may prevent you from failing a drug test!

(A) Stimulants:

Amiphenazole	Methylene-dioxymethamphetamine (MDMA, ecstasy)
Amphetamine	Methylphenidate
Bemigrade	Nikethamide
Benzphetamine	Pemoline
Bromantan	Pentetrazol
Caffeine (guarana)	Phendimetrazine
Chlorphentermine	Phenmetrazine
Cocaine	Phentermine
Cropropamide	Phenylephrine
Crothetamide	Phenylpropanolamine
Diethylpropion	Picrotoxine
Dimethylamphetamine	Pipradol
Doxapram	Prolintane
Ephedrine (ephedra, ma huang)	Strychnine
Ethamivan	Synephrine (citrus aurantium, zhi shi, bitter orange)
Ethylamphetamine	And related compounds
Fencamfamine	
Meclofenoxate	
Methamphetamine	

(B) Anabolic Agents:

Anabolic steroids	Nandrolone
Androstenediol	Norandrostenediol
Androstenedione	Norandrostenedione
Boldenone	Norethandrolone
Clostebol	Oxandrolone
Dehydrochlormethyl-testosterone	Oxymesterone
Dehydroepiandrosterone (DHEA)	Oxymetholone
Dihydrotestosterone (DHT)	Stanozolol
Dromostanolone	Testosterone
Fluoxymesterone	Tetrahydrogestrinone
Gestrinone	Trenbolone
Mesterolone	And related compounds
Methandienone	<u>Other anabolic agents:</u>
Methenolone	Clenbuterol
Methyltestosterone	

(C) Substances Banned for Specific Sports:

Rifle:

Alcohol	Pindolol
Atenolol	Propranolol
Metoprolol	Timolol
Nadolol	And related compounds

(D) Diuretics:

Acetazolamide	Hydroflumethiazide
Bendroflumethiazide	Methyclothiazide
Benzthiazide	Metolazone
Bumetanide	Polythiazide
Chlorothiazide	Quinethazone
Chlorthalidone	Spironolactone
Ethacrynic acid	Triamterene
Flumethiazide	Trichlormethiazide
Furosemide	And related compounds
Hydrochlorothiazide	

(E) Street Drugs:

Heroin	THC (tetrahydrocannabinol)
Marijuana	

(F) Peptide Hormones and Analogues:

Chorionic gonadotrophin (HCG-human chorionic gonadotrophin)	All the respective releasing factors of the above-mentioned substances are also banned
Corticotrophin (ACTH)	Erythropoietin (EPO)
Growth hormone (HGH, somatotrophin)	Sermorelin

(G) Definitions of positive depends on the following:

For caffeine – if the concentration in urine exceeds 15 micrograms/ml.

For testosterone – if the administration of testosterone or use of any other manipulation has the result of increasing the ratio of the total concentration of testosterone to that of epitestosterone in the urine to greater than 6:1, unless there is evidence that this ration is due to a physiological or pathological condition.

For marijuana and THC – if the concentration in the urine of TCH metabolite exceeds 15 nanograms/ml.
